Key Features
Patented bracketless technology for exceptional visibility in any weather.
 Bracketless is the new shape of wiper blade technology. As the name implies, bracketless wiper blades, also known as beam or flat blades, are designed without the metal or plastic brackets, joints or hinges of conventional wiper blades. So snow and ice have nowhere to build up. In addition, the patented design of Bosch Evolution™ features dual precision-tensioned steel springs that distribute more uniform pressure along the entire length of the blade for exceptional all-weather visibility. Replace your conventional wiper blades with Bosch Evolution™ and see if

Key Features
Up to 40% longer life than other premium blades.
 Each year, more and more vehicle manufacturers are specifying beam blades as original equipment. Beam (or flat) wiper blades are designed without metal or plastic brackets, joints or hinges, offering design and performance improvements over conventional wiper blades. The award-winning design of Bosch ICON™ distributes more uniform pressure along the entire length of the blade for ultimate all-season performance that lasts up to 40% longer than other premium wiper blades. Bosch ICON™ is the perfect choice for your wiper blade replacement needs.
